Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (original): A method comprising:

upon receiving a device command from a first host,

- reserving for the first host a device targeted by the device command; and
- ii) setting a reservation time period for expiration of the reservation.

Claim 2 (original): The method of claim 1, further comprising upon receiving a second device command from the first host, resetting the reservation time period.

Claim 3 (original): The method of claim 1, further comprising:

upon receiving a device command targeted to the device from a second host,

determining if the device is reserved; and

if the device is reserved to a host other than the second host, denying the device command from the second host.

Claim 4 (original): The method of claim 3, wherein determining if the device is reserved comprises determining if the reservation time period has expired.

Claim 5 (original): The method of claim 3, further comprising if the device is not reserved, executing the device command from the second host.

Claim 6 (original): The method of claim 3, wherein the device command from the second host comprises a clear command.

Appl. No. 10/645,721 Response dated July 18, 2005 Reply to Office Action of April 19, 2005

Claim 7 (original): The method of claim 1, wherein the reservation time period comprises a time period determined based on the device command.

Claim 8 (original): The method of claim 1, wherein the device command comprises one of a write command, a rewind command, a read command, a load command, an unload command, and a seek command.

Claim 9 (original): The method of claim 1, wherein the device command comprises a tape device command.

Claim 10 (original): The method of claim 1, wherein the device command comprises a disk device command.

Claim 11 (original): The method of claim 1, wherein the device command comprises a Small Computer System Interface (SCSI) command.

Claim 12 (original): A method comprising:

upon receiving a first command of a predetermined type from a first host, and if a device targeted by the device command is not reserved,

- i) reserving the device for the first host; and
- ii) setting a reservation time period for expiration of the reservation;
 upon receiving a subsequent command of a predetermined type from the first host, while the device is reserved for the first host, resetting the reservation period; and

upon receiving the subsequent command of a predetermined type from the first host, when the reservation status is not reserved for the first host, processing the subsequent command as the first command.

Claim 13 (original): The method of claim 12, further comprising upon receiving a second command of a predetermined type targeted to the device from a second

Appl. No. 10/645,721 Response dated July 18, 2005 Reply to Office Action of April 19, 2005

host, while the device is reserved for the first host, denying the second command.

Claim 14 (original): The method of claim 13, wherein the second command comprises one of a write command, a rewind command, a read command, a load command, an unload command, and a seek command.

Claim 15 (original): The method of claim 13, wherein the second command comprises a clear command.

Claim 16 (original): The method of claim 13, further comprising upon receiving a second command of a predetermined type targeted to the device from a second host, while the device is reserved for the first host, executing the second command.

Claim 17 (original): The method of claim 16, wherein the first command and the second command comprise Small Computer Systems Interface (SCSI) commands.

Claim 18 (currently amended): The method of claim 17, wherein the second command comprises one of an inquiry command, a request sense command, and a log sense command.

Claim 19 (original): An apparatus comprising:

an interface to receive commands from a plurality of hosts;

a reservation agent, communicatively coupled to the interface, the reservation agent to determine if a device targeted by a first command is reserved, and if the device is not reserved, to reserve the device for a first host initiating the first command and to set a reservation time period for expiration of the reservation.

Appl. No. 10/645,721 Response dated July 18, 2005 Reply to Office Action of April 19, 2005

Claim 20 (original): The apparatus of claim 19, wherein the reservation agent is further to deny a second command targeted to the device received from a second host while the device reserved to the first host.

Claim 21 (original): The apparatus of claim 19, wherein the reservation agent is further to reset the reservation time period upon receiving a second command targeted to the device from the first host while the device is reserved for the first host.

Claim 22 (original): An apparatus comprising:

first means for receiving commands from a plurality of hosts; and second means, communicatively coupled to the first means, for determining if a device targeted by a first command is reserved, , for reserving the device for a first host initiating the first command upon receiving the first command while the device is not reserved, and for setting a reservation time period for expiration of the reservation.

Claim 23 (original): The apparatus of claim 22, wherein the second means further comprises means for denying a second command targeted to the device received from a second host while the device is reserved for the first host.
